

Aluminium Industry

- **Refractories play a significant role in aluminium production and the production of other high-temperature materials. These refractories are nothing but a range of materials that offer the necessary thermal insulation and chemical and mechanical resistance during the production of aluminium and its alloys.**
- **ASF0UR REFRACTORIES has been offering our customers a wide range of refractory and insulation solutions to serve our aluminium industry customers around the region.**
- **Our ability to offer quality and customized solutions has helped us set our footprints in the aluminium industry.**
